

Bespoke Fabrications & Engineering Solutions

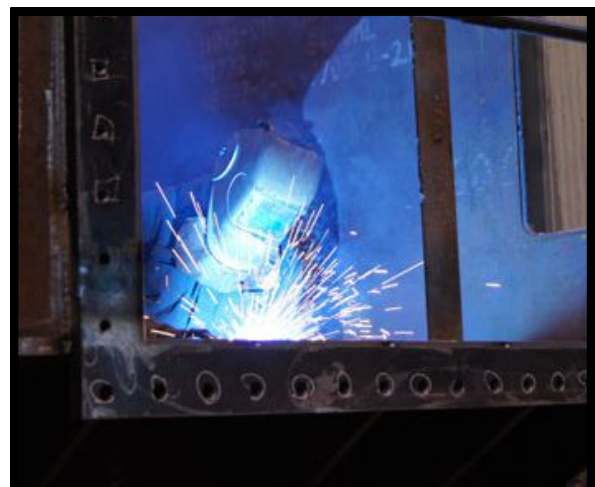

**Precision Fabrications in Heavy Steel
and Stainless Steel**

Founded in 1984

Your Heavy Steel & Stainless Steel Fabrication Specialists

Our reputation for quality and expertise has made us the preferred choice for industries such as power generation, renewable energy, and construction.

What We Can Do for You

Heavy Steel Fabrication

- Structural steel, power generation components, and large-scale industrial fabrications.

Stainless Steel Fabrication

- Custom components, tanks, vessels, and corrosion-resistant structures.

Jigs & Specialist Products

- Precision jigs and bespoke products for manufacturing production lines.

Custom Engineering Solutions

- Fabrications for large industrial projects.

Welding & Inspection Services

- Certified welding and non-destructive testing (NDT) to industry standards.
